DETAILED ACTION

Drawings

1. The proposed drawing correction, filed on April 8, 2003, has been approved.
2. The corrected drawing was received on April 8, 2003. The drawing is approved.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12, 13, 15-18, 28, and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Umotoy et al, US Patent 6,302,965 B1, in view of Park, 2002/0000196 A1.

Umotoy et al teaches a processing chamber that includes: walls 12, a processing gas supply, a wafer support 14, a showerhead 20 with an inlet portion 24 with aperture 30, 31, 32 and an outlet portion with a elongated slot 42, 44, 46 connected to the aperture. The elongated slot has a length of at least one-half a thickness of the face plate, is circular and continuous, and the width of the elongated slot is at least 2.25 times larger than the width of the aperture.

Umotoy et al differs from the present invention in that Umotoy et al does not teach a tapered face plate to improve the uniformity of the deposited layer.

Park teaches tapering a face plate to improve the uniformity of the deposited layer (figures 8, 9 and 10; paragraphs 42-46).

The motivation for tapering the face plate is to improve the uniformity of the deposited layer as taught by Park (paragraph 46).

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to taper the showerhead of Umotoy et al as taught by Park.

Response to Arguments

5. Applicant's arguments filed April 8, 2003 have been fully considered but they are not persuasive. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation to combine is found in Park. Park clearly teaches that the "thickness, purity and electrical characteristics of a deposited thin film can be adjusted to desired values" (paragraph 46) by tapering the face plate. Both references need not provide motivation as argued, all that is required is that one reference provides motivation to modify a second reference. Furthermore, in response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art teaches the technological background of the invention.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
